Privacy policy

Privacy Policy

We created this Privacy Policy (version 01.01.1970-121476558), to declare which information we collect, how we use data and which options the users of our website have, according to the guidelines of the [General Data Protection Regulation \(EU\) 2016/679](#)

Unfortunately, these subjects sound rather technical due to their nature, but we have put much effort into describing the most important things as simply and clearly as possible.

Automatic Data Retention

Every time you visit a website nowadays, certain information is automatically created and saved, just as it happens on this website.

Whenever you visit our website such as you are doing right now, our webserver (computer on which this website is saved/stored) automatically saves data such as

- the address (URL) of the accessed website
- browser and browser version
- the used operating system
- the address (URL) of the previously visited site (referrer URL)
- the host name and the IP-address of the device the website is accessed from
- date and time

in files (webserver-logfiles).

Generally, webserver-logfiles stay saved for two weeks and then get deleted automatically. We do not pass this information to others, but we cannot exclude the possibility that this data will be looked at in case of illegal conduct.

Cookies

Our website uses HTTP-cookies to store user-specific data.

For your better understanding of the following Privacy Policy statement, we will explain to you below what cookies are and why they are in use.

What exactly are cookies?

Every time you surf the internet, you use a browser. Common browsers are for example Chrome, Safari, Firefox, Internet Explorer and Microsoft Edge. Most websites store small text-files in your browser. These files are called cookies.

What should not be dismissed, is that cookies are very useful little helpers. Nearly all websites use cookies. More accurately speaking these are HTTP-cookies, since there are also different cookies for other uses. http-cookies are small files which our website stores on your computer. These cookie files are automatically put into the cookie-folder, which is like the “brain” of your browser. A cookie consists of a name and a value. Moreover, to define a cookie, one or multiple attributes must be specified.

Cookies save certain parts of your user data, such as e.g. language or personal page settings. When you re-open our website, your browser submits these “user specific” information back to our site. Thanks to cookies, our website knows who you are and offers you the settings you are familiar to. In some browsers every cookie has its own file, in others such as Firefox, all cookies are stored in one single file.

There are both first-party cookies and third-party cookies. First-party cookies are created directly by our site, while third-party cookies are created by partner-websites (e.g. Google Analytics). Every cookie is individual, since every cookie stores different data. The expiration time of a cookie also varies – it can be a few minutes, or up to a few years. Cookies are no software-programs and contain no computer viruses, trojans or any other malware. Cookies also cannot access your PC’s information.

This is an example of how cookie-files can look:

name: _ga

value: GA1.2.1326744211.152121476558-9

purpose: differentiation between website visitors

expiration date: after 2 years

A browser should support these minimum sizes:

- at least 4096 bytes per cookie
- at least 50 cookies per domain
- at least 3000 cookies in total

Which types of cookies are there?

What exact cookies we use, depends on the used services. We will explain this in the following sections of the Privacy Policy statement. Firstly, we will briefly focus on the different types of HTTP-cookies.

There are 4 different types of cookies:

Essential Cookies

These cookies are necessary to ensure the basic function of a website. They are needed when a user for example puts a product into their shopping cart, then continues surfing on different websites and comes back later in order to proceed to the checkout. Even when the user closed their window

priorly, these cookies ensure that the shopping cart does not get deleted.

Purposive Cookies

These cookies collect info about the user behaviour and record if the user potentially receives any error messages. Furthermore, these cookies record the website's loading time as well as its behaviour within different browsers.

Target-orientated Cookies

These cookies care for an improved user-friendliness. Thus, information such as previously entered locations, fonts or data in forms stay saved.

Advertising Cookies

These cookies are also known as targeting-Cookies. They serve the purpose of delivering individually adapted advertisements to the user. This can be very practical, but also rather annoying.

Upon your first visit to a website you are usually asked which of these cookie-types you want to accept. Furthermore, this decision will of course also be saved in a cookie.

How can I delete cookies?

You yourself take the decision if and how you want to use cookies. Thus, no matter what service or website cookies are from, you always have the option to delete, deactivate or only partially allow them. Therefore, you can for example block cookies of third parties but allow any other cookies.

If you want change or delete cookie-settings and would like to determine which cookies have been saved to your browser, you can find this info in your browser-settings:

[Chrome: Clear, enable and manage cookies in Chrome](#)

[Safari: Manage cookies and website data in Safari](#)

Firefox: Clear cookies and site data in Firefox

Internet Explorer: Delete and manage cookies

Microsoft Edge: Delete cookies in Microsoft Edge

If you generally do not want to allow any cookies at all, you can set up your browser in a way, to notify you whenever a potential cookie is about to be set. This gives you the opportunity to manually decide to either permit or deny the placement of every single cookie. The settings for this differ from browser to browser. Therefore, it might be best for you to search for the instructions in Google. If you are using Chrome, you could for example put the search phrase "delete cookies Chrome" or "deactivate cookies Chrome" into Google.

How is my data protected?

There is a "cookie policy" that has been in place since 2009. It states that the storage of cookies requires the user's consent. However, among the countries of the EU, these guidelines are often met with mixed reactions. In Austria the guidelines have been implemented in § 96 section 3 of the Telecommunications Act (TKG).

If you want to learn more about cookies and do not mind technical documentation, we recommend <https://tools.ietf.org/html/rfc6265>, the Request for Comments of the Internet Engineering Task Force (IETF) called "HTTP State Management Mechanism".

Storage of Personal Data

Any personal data you electronically submit to us on this website, such as your name, email address, home address or other personal information you provide via the transmission of a form or

via any comments to the blog, are solely used for the specified purpose and get stored securely along with the respective submission times and IP-address. These data do not get passed on to third parties.

Therefore, we use personal data for the communication with only those users, who have explicitly requested being contacted, as well as for the execution of the services and products offered on this website. We do not pass your personal data to others without your approval, but we cannot exclude the possibility this data will be looked at in case of illegal conduct.

If you send us personal data via email – and thus not via this website – we cannot guarantee any safe transmission or protection of your data. We recommend you, to never send confidential data via email.

Rights in accordance with the General Data Protection Regulation

You are granted the following rights in accordance with the provisions of the [GDPR](#) (General Data Protection Regulation) and the Austrian [Data Protection Act \(DSG\)](#):

- right to rectification (article 16 GDPR)
- right to erasure (“right to be forgotten“) (article 17 GDPR)
- right to restrict processing (article 18 GDPR)
- right to notification – notification obligation regarding rectification or erasure of personal data or restriction of processing (article 19 GDPR)
- right to data portability (article 20 GDPR)
- Right to object (article 21 GDPR)
- right not to be subject to a decision based solely on automated processing – including profiling – (article 22 GDPR)

If you think that the processing of your data violates the data protection law, or that your data protection rights have been infringed in any other way, you can lodge a complaint with your respective regulatory authority. For Austria this is the data protection authority, whose website you can access at <https://www.data-protection-authority.gv.at/>.

Evaluation of Visitor Behaviour

In the following Privacy Policy, we will inform you on if and how we evaluate the data of your visit to this website. The evaluation is generally made anonymously, and we cannot link to you personally based on your behaviour on this website.

You can find out more about how to disagree with the evaluation of visitor data, in the Privacy Policy below.

TLS encryption with https

We use https to transfer information on the internet in a tap-proof manner (data protection through technology design [Article 25 Section 1 GDPR](#)). With the use of TLS (Transport Layer Security), which is an encryption protocol for safe data transfer on the internet, we can ensure the protection of confidential information. You can recognise the use of this safeguarding tool by the little lock-symbol, which is situated in your browser’s top left corner, as well as by the use of the letters https (instead of http) as a part of our web address.

Google Fonts Privacy Policy

On our website we use Google Fonts, from the company Google Inc. (1600 Amphitheatre Parkway Mountain View, CA 94043, USA).

To use Google Fonts, you must log in and set up a password. Furthermore, no cookies will be saved in your browser. The data (CSS, Fonts) will be requested via the Google domains fonts.googleapis.com and fonts.gstatic.com. According to Google, all requests for CSS and fonts are fully separated from any other Google services. If you have a Google account, you do not need to worry that your Google account details are transmitted to Google while you use Google Fonts. Google records the use of CSS (Cascading Style Sheets) as well as the utilised fonts and stores these data securely. We will have a detailed look at how exactly the data storage works.

What are Google Fonts?

Google Fonts (previously Google Web Fonts) is a list of over 800 fonts which [href="https://en.wikipedia.org/wiki/Google?tid=121476558">](https://en.wikipedia.org/wiki/Google?tid=121476558)Google LLC provides its users for free.

Many of these fonts have been published under the SIL Open Font License license, while others have been published under the Apache license. Both are free software licenses.

Why do we use Google Fonts on our website?

With Google Fonts we can use different fonts on our website and do not have to upload them to our own server. Google Fonts is an important element which helps to keep the quality of our website high. All Google fonts are automatically optimised for the web, which saves data volume and is an advantage especially for the use of mobile terminal devices. When you use our website, the low data size provides fast loading times. Moreover, Google Fonts are secure Web Fonts. Various image synthesis systems (rendering) can lead to errors in different browsers, operating systems and mobile terminal devices. These errors could optically distort parts of texts or entire websites. Due to the fast Content Delivery Network (CDN) there are no cross-platform issues with Google Fonts. All common browsers (Google Chrome, Mozilla Firefox, Apple Safari, Opera) are supported by Google Fonts, and it reliably operates on most modern mobile operating systems, including Android 2.2+ and iOS 4.2+ (iPhone, iPad, iPod). We also use Google Fonts for presenting our entire online service as pleasantly and as uniformly as possible.

Which data is saved by Google?

Whenever you visit our website, the fonts are reloaded by a Google server. Through this external cue, data gets transferred to Google's servers. Therefore, this makes Google recognise that you (or your IP-address) is visiting our website. The Google Fonts API was developed to reduce the usage, storage and gathering of end user data to the minimum needed for the proper depiction of fonts. What is more, API stands for „Application Programming Interface“ and works as a software data intermediary.

Google Fonts stores CSS and font requests safely with Google, and therefore it is protected. Using its collected usage figures, Google can determine how popular the individual fonts are. Google publishes the results on internal analysis pages, such as Google Analytics. Moreover, Google also utilises data of its own web crawler, in order to determine which websites are using Google fonts. This data is published in Google Fonts' BigQuery database. Entrepreneurs and developers use Google's webservice BigQuery to be able to inspect and move big volumes of data.

One more thing that should be considered, is that every request for Google Fonts automatically transmits information such as language preferences, IP address, browser version, as well as the

browser's screen resolution and name to Google's servers. It cannot be clearly identified if this data is saved, as Google has not directly declared it.

How long and where is the data stored?

Google saves requests for CSS assets for one day in a tag on their servers, which are primarily located outside of the EU. This makes it possible for us to use the fonts by means of a Google stylesheet. With the help of a stylesheet, e.g. designs or fonts of a website can get changed swiftly and easily.

Any font related data is stored with Google for one year. This is because Google's aim is to fundamentally boost websites' loading times. With millions of websites referring to the same fonts, they are buffered after the first visit and instantly reappear on any other websites that are visited thereafter. Sometimes Google updates font files to either reduce the data sizes, increase the language coverage or to improve the design.

How can I delete my data or prevent it being stored?

The data Google stores for either a day or a year cannot be deleted easily. Upon opening the page this data is automatically transmitted to Google. In order to clear the data ahead of time, you have to contact Google's support at <https://support.google.com/?hl=en-GB&tid=121476558>. The only way for you to prevent the retention of your data is by not visiting our website.

Unlike other web fonts, Google offers us unrestricted access to all its fonts. Thus, we have a vast sea of font types at our disposal, which helps us to get the most out of our website. You can find out more answers and information on Google Fonts at <https://developers.google.com/fonts/faq?tid=121476558>. While Google does address relevant elements on data protection at this link, it does not contain any detailed information on data retention.

It proves rather difficult to receive any precise information on stored data by Google.

On <https://policies.google.com/privacy?hl=en-GB> you can read more about what data is generally collected by Google and what this data is used for.

Google Fonts Local Privacy Policy

On our website we use Google Fonts, from the company Google Inc. (1600 Amphitheatre Parkway Mountain View, CA 94043, USA).

We integrated Google Fonts locally, so on our own webserver and not on Google's servers. Hence, there is no connection to Google's servers and consequently no data transfer or retention.

What are Google Fonts?

Google Fonts was previously called Google Web Fonts. It is an interactive list with over 800 fonts which [Google LLC](#) offer for free use. With the use of Google Fonts, it is possible to utilise fonts without uploading them to your own server. For that matter, in order to prevent any transfer of information to Google's servers, we downloaded the fonts to our own server. This way we comply with the data privacy and do not transmit any data to Google Fonts.

Unlike other web fonts, Google offers us unrestricted access to all its fonts. Thus, we have a vast sea of font types at our disposal, which helps us to get the most out of our website. You can find out more answers and information on Google Fonts at <https://developers.google.com/fonts/faq?tid=121476558>.

Google Analytics Privacy Policy

We use the tracking and analysis tool Google Analytics (GA) of the US-American company Google LLC (1600 Amphitheatre Parkway Mountain View, CA 94043, USA). Google Analytics collects data on your actions on our website. Whenever you click a link for example, this action is saved in a cookie and transferred to Google Analytics. With the help of reports which we receive from Google Analytics, we can adapt our website and our services better to your wishes. In the following, we will explain the tracking tool in more detail, and most of all, we will inform you what data is saved and how you can prevent this.

What is Google Analytics?

Google Analytics is a tracking tool with the purpose of conducting data traffic analysis of our website. For Google Analytics to work, there is a tracking code integrated to our website. Upon your visit to our website, this code records various actions you perform on your website. As soon as you leave our website, this data is sent to the Google Analytics server, where it is stored.

Google processes this data and we then receive reports on your user behaviour. These reports can be one of the following:

- Target audience reports: With the help of target audience reports we can get to know our users better and can therefore better understand who is interested in our service.
- Advertising reports: Through advertising reports we can analyse our online advertising better and hence improve it.
- Acquisition reports: Acquisition reports provide us helpful information on how we can get more people enthusiastic about our service.
- Behaviour reports: With these reports, we can find out how you interact with our website. By the means of behaviour reports, we can understand what path you go on our website and what links you click.
- Conversion reports: A conversion is the process of leading you to carry out a desired action due to a marketing message. An example of this would be transforming you from a mere website visitor into a buyer or a newsletter subscriber. Hence, with the help of these reports we can see in more detail, if our marketing measures are successful with you. Our aim is to increase our conversion rate.
- Real time reports: With the help of these reports we can see in real time, what happens on our website. It makes us for example see, we can see how many users are reading this text right now.

Why do we use Google Analytics on our website?

The objective of our website is clear: We want to offer you the best possible service. Google Analytics' statistics and data help us with reaching this goal.

Statistically evaluated data give us a clear picture of the strengths and weaknesses of our website. On the one hand, we can optimise our page in a way, that makes it easier to be found by interested people on Google. On the other hand, the data helps us to get a better understanding of you as our visitor. Therefore, we can very accurately find out what we must improve on our website, in order to offer you the best possible service. The analysis of that data also enables us to carry out our advertising and marketing measures in a more individual and more cost-effective way. After all, it only makes sense to show our products and services exclusively to people who are interested in them.

What data gets stored by Google Analytics?

With the aid of a tracking code, Google Analytics creates a random, unique ID which is connected to your browser cookie. That way, Google Analytics recognises you as a new user. The next time you visit our site, you will be recognised as a “recurring” user. All data that is collected gets saved together with this very user ID. Only this is how it is made possible for us to evaluate and analyse pseudonymous user profiles.

Your interactions on our website are measured by tags such as cookies and app instance IDs. Interactions are all kinds of actions that you perform on our website. If you are also using other Google systems (such as a Google Account), data generated by Google Analytics can be linked with third-party cookies. Google does not pass on any Google Analytics data, unless we as the website owners authorise it. In case it is required by law, exceptions can occur.

The following cookies are used by Google Analytics:

Name: `_ga`

Value: 2.1326744211.152121476558-5

Purpose: By default, analytics.js uses the cookie `_ga`, to save the user ID. It generally serves the purpose of differentiating between website visitors.

Expiration date: After 2 years

Name: `_gid`

Value: 2.1687193234.152121476558-1

Purpose: This cookie also serves the purpose of differentiating between website users

Expiration date: After 24 hours

Name: `_gat_gtag_UA_`

Value: 1

Verwendungszweck: It is used for decreasing the demand rate. If Google Analytics is provided via Google Tag Manager, this cookie gets the name `_dc_gtm_`.

Expiration date: After 1 minute

Name: `AMP_TOKEN`

Value: No information

Purpose: This cookie has a token which is used to retrieve the user ID by the AMP Client ID Service. Other possible values suggest a logoff, a request or an error.

Expiration date: After 30 seconds up to one year

Name: `__utma`

Value: 1564498958.1564498958.1564498958.1

Purpose: With this cookie your behaviour on the website can be tracked and the site performance can be measured. The cookie is updated every time the information is sent to Google Analytics.

Expiration date: After 2 years

Name: `__utmt`

Value: 1

Purpose: Just like `_gat_gtag_UA_` this cookie is used for keeping the requirement rate in check.

Expiration date: After 10 minutes

Name: `__utmb`

Value: 3.10.1564498958

Purpose: This cookie is used to determine new sessions. It is updated every time new data or information gets sent to Google Analytics.

Expiration date: After 30 minutes

Name: `__utmz`

Value: 167421564

Purpose: This cookie is used to determine new sessions for recurring visitors. It is therefore a session cookie, and only stays saved until you close the browser again.

Expiration date: After closing the browser

Name: __utmz

Value: m|utmccn=(referral)|utmcmd=referral|utmctt=

Purpose: This cookie is used to identify the source of our website's visitor number. This means, that the cookie saves information on where you came to our website from. This could be another site or an advertisement.

Expiration date: After 6 months

Name: __utmv

Value: No information

Purpose: The cookie is used to store custom user data. It gets updated whenever information is sent to Google Analytics.

Expiration date: After 2 years

Note: This list is by no means exhaustive, since Google are repeatedly changing the use of their cookies.

Below we will give you an overview of the most important data that can be evaluated by Google Analytics:

Heatmaps: Google creates so-called Heatmaps. These Heatmaps make it possible to see the exact areas you click on, so we can get information on what routes you make on our website.

Session duration: Google calls the time you spend on our website without leaving it session duration. Whenever you are inactive for 20 minutes, the session ends automatically.

Bounce rate If you only look at one page of our website and then leave our website again, it is called a bounce.

Account creation: If you create an account or make an order on our website, Google Analytics collects this data.

IP-Address: The IP address is only shown in a shortened form, to make it impossible to clearly allocate it.

Location: Your approximate location and the country you are in can be defined by the IP address. This process is called IP location determination.

Technical information: Information about your browser type, your internet provider and your screen resolution are called technical information.

Source: Both, Google Analytics as well as ourselves, are interested what website or what advertisement led you to our site.

Further possibly stored data includes contact data, potential reviews, playing media (e.g. when you play a video on our site), sharing of contents via social media or adding our site to your favourites. This list is not exhaustive and only serves as general guidance on Google Analytics' data retention.

How long and where is the data saved?

Google has servers across the globe. Most of them are in America and therefore your data is mainly saved on American servers. Here you can read detailed information on where Google's data centres are located: <https://www.google.com/about/datacenters/inside/locations/?hl=en>

Your data is allocated to various physical data mediums. This has the advantage of allowing to retrieve the data faster, and of protecting it better from manipulation. Every Google data centre has respective emergency programs for your data. Hence, in case of a hardware failure at Google or a

server error due to natural disasters, the risk for a service interruption stays relatively low.

Google Analytics has a 26 months standardised period of retaining your user data. After this time, your user data is deleted. However, we have the possibility to choose the retention period of user data ourselves. There are the following five options:

- Deletion after 14 months
- Deletion after 26 months
- Deletion after 38 months
- Deletion after 50 months
- No automatical deletion

As soon as the chosen period is expired, the data is deleted once a month. This retention period applies to any of your data which is linked to cookies, user identification and advertisement IDs (e.g. cookies of the DoubleClick domain). Any report results are based on aggregated information and are stored independently of any user data. Aggregated information is a merge of individual data into a single and bigger unit.

How can I delete my data or prevent data retention?

Under the provisions of the European Union's data protection law, you have the right to obtain information on your data and to update, delete or restrict it. With the help of a browser add on that can deactivate Google Analytics' JavaScript (ga.js, analytics.js, dc.js), you can prevent Google Analytics from using your data. You can download this add on at

<https://tools.google.com/dlpage/gaoptout?hl=en-GB>. Please consider that this add on can only deactivate any data collection by Google Analytics.

Should you generally want to deactivate, delete or manage all cookies (independently of Google Analytics), you can use one of the guides that are available for any browser:

[Chrome: Clear, enable and manage cookies in Chrome](#)

[Safari: Manage cookies and website data in Safari](#)

Firefox: Clear cookies and site data in Firefox

Internet Explorer: Delete and manage cookies

Microsoft Edge: Delete cookies in Microsoft Edge

Google Analytics is an active participant of the EU-U.S. Privacy Shield Framework, which regulates correct and save transfer of personal data.

You can find more information on this at <https://www.privacyshield.gov/participant?id=a2zt000000001L5AAI&tid=121476558>.

We hope we were able to make you more familiar with the most important information on Google Analytics' data processing. If you want to learn more about the tracking service, we recommend both of the following links:

<https://marketingplatform.google.com/about/analytics/terms/gb/> and

<https://support.google.com/analytics/answer/6004245?hl=en>.

Google Analytics IP Anonymisation

We implemented Google Analytics' IP address anonymisation to this website. Google developed this function, so this website can comply with the applicable privacy laws and the local data protection authorities' recommendations, should they prohibit the retention of any full IP addresses. The anonymisation or masking of IP addresses takes place, as soon as they reach Google Analytics' data collection network, but before the data would be saved or processed.

You can find more information on IP anonymisation at

<https://support.google.com/analytics/answer/2763052?hl=en>.

Google Analytics Reports on demographic characteristics and interests

We have turned on Google Analytics' functions for advertising reports. These reports on demographic characteristics and interests contain details about age, gender and interests. Through them we can get a better picture of our users – without being able to allocate any data to individual persons. You can learn more about advertising functions at [auf https://support.google.com/analytics/answer/3450482?hl=en&%3Butm_id=ad](https://support.google.com/analytics/answer/3450482?hl=en&%3Butm_id=ad).

You can terminate the use of your Google Account's activities and information in "Ads Settings" at <https://adssettings.google.com/authenticated> via a checkbox.

Google Analytics Deactivation Link

By clicking on the following **deactivation link** you can prevent Google from tracking your further visits. Caution: The deletion of cookies, the use of your browser's incognito/private mode or the use of a different browser may lead to your data being collected again.

Deactivate Google Analytics

Google Analytics' Data Processing Amendment

By accepting the amendment on data processing in Google Analytics, we entered a contract with Google concerning the use of Google Analytics.

You can find out more about the amendment on data processing for Google Analytics here: https://support.google.com/analytics/answer/3379636?hl=en&utm_id=ad

Google Analytics Google Signals Privacy Policy

We have activated Google signals in Google Analytics. Through this, any existing Google Analytics functions (advertising reports, remarketing, cross-device reports and reports on interests and demographic characteristics) are updated, to result in the summary and anonymisation of your data, should you have permitted personalised ads in your Google Account.

The special aspect of this is that it involves cross-device tracking. That means your data can be analysed across multiple devices. Through the activation of Google signals, data is collected and linked to the Google account. For example, it enables Google to recognise when you look at a product on a smartphone and later buy the product on a laptop. Due to activating Google signals, we can start cross-device remarketing campaigns, which would otherwise not be possible to this extent. Remarketing means, that we can show you our products and services across other websites as well.

Moreover, further visitor data such as location, search history, YouTube history and data about your actions on our website are collected in Google Analytics. As a result, we receive improved advertising reports and more useful information on your interests and demographic characteristics. These include your age, the language you speak, where you live or what your gender is. Certain social criteria such as your job, your marital status or your income are also included. All these characteristics help Google Analytics to define groups of persons or target audiences.

Those reports also help us to better assess your behaviour, as well as your wishes and interests. As a result, we can optimise and customise our products and services for you. By default, this data expires after 26 months. Please consider, that this data is only collected if you have agreed to

personalised advertisement in your Google Account. The retained information is always exclusively summarised and anonymous data, and never any data on individual persons. You can manage or delete this data in your Google Account.

Facebook Pixel Privacy Policy

We use Facebook's Facebook pixel on our website. For that, we have implemented a code on our website. The Facebook pixel is a segment of a JavaScript code, which, in case you arrived on our website via Facebook ads, loads an array or functions that enable Facebook to track your user actions. For example, if you buy a product on our website, the Facebook pixel is triggered and then saves your actions on our website in one or more cookies. These cookies enable Facebook to match your user data (customer data such as IP address, user ID) with the data of your Facebook account. After that, Facebook deletes your data again. The collected data is anonymous as well as inaccessible and can only be used for ad placement purposes. If you are a Facebook user and you are logged in, your visit to our website is automatically assigned to your Facebook user account.

We exclusively want to show our products or services to persons, who are interested in them. With the aid of the Facebook pixel, our advertising measures can get better adjusted to your wishes and interests. Therefore, Facebook users get to see suitable advertisement (if they allowed personalised advertisement). Moreover, Facebook uses the collected data for analytical purposes and for its own advertisements.

In the following we will show you the cookies, which were set on a test page through the integration of the Facebook pixel. Please consider that these cookies are only examples. Depending on the interaction that is made on our website, different cookies are set.

Name: _fbp

Value: fb.1.1568287647279.257405483-6121476558-7

Purpose: Dieses Cookie verwendet Facebook, um Werbeprodukte anzuzeigen.

Expiration date: nach 3 Monaten

Name: fr

Value: 0aPf312HOS5Pboo2r..Bdeiuf...1.0.Bdeiuf.

Purpose: Dieses Cookie wird verwendet, damit Facebook-Pixel auch ordentlich funktioniert.

Expiration date: nach 3 Monaten

Name: comment_author_50ae8267e2bdf1253ec1a5769f48e062121476558-3

Value: Name of the author

Purpose: This cookie saves the text and name of a user who e.g. leaves a comment.

Expiration date: after 12 months

Name: comment_author_url_50ae8267e2bdf1253ec1a5769f48e062

Value: https%3A%2F%2Fwww.testseite...%2F (URL of the author)

Purpose: This cookie saved the URL of the website that the user types into a text box on our website.

Expiration date: after 12 months

Name: comment_author_email_50ae8267e2bdf1253ec1a5769f48e062

Value: email address of the author

Purpose: This cookie saves the email address of the user, if they provided it on the website.

Expiration date: after 12 months

Note: The above-mentioned cookies relate to an individual user behaviour. Moreover, especially concerning the usage of cookies, changes at Facebook can never be ruled out.

If you are registered at Facebook, you can change the settings for advertisements yourself at https://www.facebook.com/ads/preferences/?entry_product=ad_settings_screen. If you are not a

Facebook user, you can manage your user based online advertising at <https://www.youonlinechoices.com/uk/your-ad-choices>. You have the option to activate or deactivate any providers there.

If you want to learn more about Facebook's data protection, we recommend you the view the company's in-house data policies at <https://www.facebook.com/policy.php>.

Privacy Policy for Facebook's Automatic Advanced Matching

Along with Facebook's pixel function, we have also activated the automatic advanced matching. This function allows us to send hashed emails, names, genders, cities, states, postcodes and dates of birth or telephone numbers as additional information to Facebook, provided you have made them available to us. This activation gives us the opportunity, to customise advertising campaigns even better to persons who are interested in our services or products.

Embedded Social Media elements Privacy Policy

We have embedded elements from social media services on our website, to display pictures, videos and texts. By visiting pages that present such elements, data is transferred from your browser to the respective social media service, where it is stored. We do not have access to this data.

The following links lead to the respective social media services' sites, where you can find a declaration on how they handle your data:

- Instagram Data Policy: <https://help.instagram.com/519522125107875>
- For YouTube, the Google Privacy Policy applies: <https://policies.google.com/privacy?hl=en-GB>
- Facebook Data Policy: <https://www.facebook.com/about/privacy>
- Twitter Privacy Policy: <https://twitter.com/en/privacy>

Facebook Data Policy

We use selected Facebook tools on our website. Facebook is a social media network of the company Facebook Ireland Ltd., 4 Grand Canal Square, Grand Canal Harbour, Dublin 2 Ireland. With the aid of this tool we can provide the best possible offers to you and anyone interested in our products and services. In the following we will give you an overview on the different Facebook tools, as well as on what data is sent to Facebook and how you can delete these data.

What are Facebook tools?

Along with many other products, Facebook also offers so called "Facebook Business Tools". This is Facebook's official name for the tools, but it is not very common. Therefore, we decided to merely call them "Facebook tools". They include the following:

- Facebook-Pixel
- social plugins (e.g. the "Like" or "Share" button)
- Facebook Login
- Account Kit
- APIs (application programming interface)
- SDKs (Software development kits)
- Platform-integrations
- Plugins
- Codes

- Specifications
- Documentations
- Technologies and Services

With these tools Facebook can extend its services and is able to receive information on user activities outside of Facebook.

Why do we use Facebook tools on our website?

We only want to show our services and products to people who are genuinely interested in them. With the help of advertisements (Facebook Ads) we can reach exactly these people. However, to be able to show suitable adverts to users, Facebook requires additional information on people's needs and wishes. Therefore, information on the user behaviour (and contact details) on our website, are provided to Facebook. Consequently, Facebook can collect better user data and is able to display suitable adverts for our products or services. Thanks to the tools it is possible to create targeted, customised ad campaigns of Facebook.

Facebook calls data about your behaviour on our website "event data" and uses them for analytics services. That way, Facebook can create "campaign reports" about our ad campaigns' effectiveness on our behalf. Moreover, by analyses we can get a better insight in how you use our services, our website or our products. Therefore, some of these tools help us optimise your user experience on our website. With the social plugins for instance, you can share our site's contents directly on Facebook.

What data is saved by the Facebook tools?

With the use of the Facebook tools, personal data (customer data) may be sent to Facebook. Depending on the tools used, customer data such as name, address, telephone number and IP address may be transmitted.

Facebook uses this information to match the data with the data it has on you (if you are a Facebook member). However, before the customer data is transferred to Facebook, a so called "Hashing" takes place. This means, that a data record of any size is transformed into a string of characters, which also has the purpose of encrypting data.

Moreover, not only contact data, but also "event data" is transferred. These data are the information we receive about you on our website. To give an example, it allows us to see what subpages you visit or what products you buy from us. Facebook does not disclose the obtained information to third parties (such as advertisers), unless the company has an explicit permission or is legally obliged to do so. Also, "event data" can be linked to contact information, which helps Facebook to offer improved, customised adverts. Finally, after the previously mentioned matching process, Facebook deletes the contact data.

To deliver optimised advertisements, Facebook only uses event data, if they have been combined with other data (that have been collected by Facebook in other ways). Facebook also uses event data for the purposes of security, protection, development and research. Many of these data are transmitted to Facebook via cookies. Cookies are little text files, that are used for storing data or information in browsers. Depending on the tools used, and on whether you are a Facebook member, a different number of cookies are placed in your browser. In the descriptions of the individual Facebook tools we will go into more detail on Facebook cookies. You can also find general information about the use of Facebook cookies at <https://www.facebook.com/policies/cookies>.

How long and where are the data saved?

Facebook fundamentally stores data, until they are no longer of use for their own services and

products. Facebook has servers for storing their data all around the world. However, customer data is cleared within 48 hours after they have been matched with their own user data.

How can I delete my data or prevent data retention?

In accordance with the General Data Protection Regulation (GDPR) you have the right of information, rectification, transfer and deletion of your data.

The collected data is only fully deleted, when you delete your entire Facebook account. Deleting your Facebook account works as follows:

- 1) Click on settings in the top right side in Facebook.
- 2) Then, click “Your Facebook information“ in the left column.
- 3) Now click on “Deactivation and deletion”.
- 4) Choose “Permanently delete account“ and then click on “Continue to account deletion“.
- 5) Enter your password, click on “continue“ and then on “Delete account“.

The retention of data Facebook receives via our site is done via cookies (e.g. with social plugins), among others. You can deactivate, clear or manage both all and individual cookies in your browser. How this can be done differs depending on the browser you use. The following instructions show, how to manage cookies in your browser:

[Chrome: Clear, enable and manage cookies in Chrome](#)

[Safari: Manage cookies and website data in Safari](#)

Firefox: Clear cookies and site data in Firefox

Internet Explorer: Delete and manage cookies

Microsoft Edge: Delete cookies in Microsoft Edge

If you generally do not want to allow any cookies at all, you can set up your browser to notify you whenever a cookie is about to be set. This gives you the opportunity to decide upon the permission or deletion of every single cookie.

Facebook is an active participant in the EU-U.S. Privacy Shield Framework, which regulates correct and secure transfer of personal data. You can find more information at <https://www.privacyshield.gov/participant?id=a2zt0000000GnywAAC>. We hope we could give you an understanding of the most important information about the use of Facebook tools and data processing. If you want to find out more on how Facebook use your data, we recommend reading the data policies at <https://www.facebook.com/about/privacy/update>.

Facebook Social Plugins Privacy Policy

We installed so-called social plugins from Facebook Inc. to our website. You can recognise these buttons by the classic Facebook logo, the “Like” button (hand with raised thumb) or by a “Facebook plugin” label. A social plugin is a small part of Facebook that is integrated into our page. Each plugin has its own function. The most used functions are the well-known “Like” and “Share” buttons.

Facebook offers the following social plugins:

- “Save” button
- “Like” button, Share, Send and Quote
- Page plugin
- Comments

- Messenger plugin
- Embedded posts and video player
- Group Plugin

At <https://developers.facebook.com/docs/plugins> you will find more information on how the individual plugins are used. On the one hand, we use the social plug-ins to offer you a better user experience on our site, and on the other hand because Facebook can optimise our advertisements with it.

If you have a Facebook account or have already visited [facebook.com](https://www.facebook.com), Facebook has already placed at least one cookie in your browser. In this case, your browser sends information to Facebook via this cookie as soon as you visit our website or interact with social plugins (e.g. the “Like” button).

The received information will be deleted or anonymised within 90 days. According to Facebook, this data includes your IP address, the websites you have visited, the date, time and other information relating to your browser.

In order to prevent Facebook from collecting much data and matching it with your Facebook data during your visit to our website, you must log out of Facebook while you visit our website.

If you are not logged in to Facebook or do not have a Facebook account, your browser sends less information to Facebook because you have fewer Facebook cookies. Nevertheless, data such as your IP address or which website you are visiting can be transmitted to Facebook. We would like to explicitly point out that we do not know what exact data is collected. However, based on our current knowledge, we want to try informing you as best we can about data processing. You can also read about how Facebook uses the data in the company’s data policy at <https://www.facebook.com/about/privacy/update>.

At least the following cookies are set in your browser when you visit a website with social plugins from Facebook:

Name: dpr

Value: no information

Purpose: This cookie is used to make the social plugins work on our website.

Expiry date: after end of session

Name: fr

Value: 0jiejy4121476558c2GnlufEJ9..Bde09j...1.0.Bde09j

Purpose: The cookie is also necessary for the plugins to function properly

Expiry date: after 3 months

Note: These cookies were set after our test and may be placed even if you are not a Facebook member.

If you are registered with Facebook, you can change your settings for advertisements yourself at https://www.facebook.com/ads/preferences/?entry_product=ad_settings_screen. If you are not a Facebook user, you can go to <https://www.youronlinechoices.com/uk/your-ad-choices/> and manage your usage-based online advertising. There you have the option to deactivate or activate providers.

If you want to learn more about Facebook’s data protection, we recommend the company’s own data policies at <https://www.facebook.com/policy.php>.

Facebook Login Privacy Policy

We integrated the convenient Facebook Login to our website. With it, you can easily log into our site with your Facebook account, without having to create a new user account. If you decide to register via the Facebook Login, you will be redirected to the social media network Facebook. There, you can log in with your Facebook user data. By using this method to log in, data on you and

your user behaviour is stored and transmitted to Facebook.

To save the data, Facebook uses various cookies. In the following we will show you the most significant cookies that are placed in your browser or that already exist when you log into our site via the Facebook Login:

Name: fr

Value: 0jiejyh4c2GnlufEJ9..Bde09j...1.0.Bde09j

Purpose: This cookie is used to make the social plugin function optimally on our website.

Expiry date: after 3 months

Name: datr

Value: 4Jh7XUA2121476558SEmPsSfzCOO4JFF1

Purpose: Facebook sets the “datr” cookie, when a web browser accesses facebook.com. The cookie helps to identify login activities and protect users.

Expiry date: after 2 years

Name: _js_datr

Value: deleted

Purpose: Facebook sets this session cookie for tracking purposes, even if you do not have a Facebook account or are logged out.

Expiry date: after the end of the session

Note: The cookies we stated are only a small range of the cookies which are available to Facebook. Other cookies include for example _fbp, sb or wd. It is not possible to disclose an exhaustive list, since Facebook have a multitude of cookies at their disposal which they use in variation.

On the one hand, Facebook Login enables a fast and easy registration process. On the other hand, it gives us the opportunity to share data with Facebook. In turn, we can customise our offer and advertising campaigns better to your needs and interests. The data we receive from Facebook by this means, is public data such as

- your Facebook name
- your profile picture
- your stored email address
- friends lists
- button clicks (e.g. “Like“ button)
- date of birth
- language
- place of residence

In return, we provide Facebook with information about your activities on our website. These include information on the terminal device you used, which of our subpages you visit, or what products you have bought from us.

By using Facebook Login, you agree to the data processing. You can terminate this agreement anytime. If you want to learn more about Facebook’s data processing, we recommend you to read Facebook’s Data Policy at <https://www.facebook.com/policy.php>.

If you are registered with Facebook, you can change your advertisement settings anytime at https://www.facebook.com/ads/preferences/?entry_product=ad_settings_screen.

Wix Privacy Policy

For our website we use the website construction-kit Wix by the Israeli company Wix.com Ltd., 40 Hanamal Tel Aviv St., Tel Aviv 6350671, Israel. In addition to the headquarters in Tel Aviv, the company also has other headquarters such as in Berlin, Dublin, Vancouver, or New York. Due to the

use of Wix, your personal data may be collected, stored and processed. In this privacy policy we want to explain why we use Wix, what data is stored, where your data is stored and how you can prevent data retention.

What is Wix?

Wix is a website construction-kit that makes it very easy to create HTML5 websites as well as mobile websites. The online platform is based on the cloud principle and allows easy integration of various Wix or third-party provider functions into your own website.

Why do we use Wix on our website?

For working on our website, we need an easy-to-use system, that allows us to present you a beautiful design and interesting content quickly and easily. We have found Wix to be the right system for this. Thanks to both, Wix's easy operation and its extensive functions, we can design our website as we wish, while ensuring its user-friendliness.

What data is stored by Wix?

Non-personal data include for example technical usage information such as browser activity, clickstream activity, session heat maps, as well as data about your computer, operating system, browser, screen resolution, language and keyboard settings, internet provider and date of the page visit.

Personal data are also recorded. These are primarily contact details (email address or telephone number, if you have provided them), IP address or your geographical location.

Tracking systems such as cookies are used to collect data about your behaviour on our website. For example, it records which sub-pages you take a particular interest in, how much time you spend on individual pages, when you leave a page (bounce rate) or which pre-sets (e.g. language settings) you have made. Based on this data, [Wix.com](https://www.wix.com) can adjust their marketing measures better to your interests and your user behaviour. Therefore, the next time you visit our website, you will get to view it with the settings you have chosen priorly. [Wix.com](https://www.wix.com) may also forward personal data to third parties (such as service providers).

Below we will show you a list of exemplary cookies that are placed due to the use of Wix:

Name: XSRF-TOKEN

Value: 1591628008|P01ovn-JtsrK

Purpose: This cookie is a security cookie and prevents the so-called cross-site request forgery, which is an attack on a computer system.

Expiry date: after end of session

Name: _wixCIDX

Value: b2474394-b64f-4c7a-a598-16b9043a8938121476558-9

Purpose: This cookie appropriately stores data when you to log in to our website, to shorten the logon process the following time.

Expiry date: after 3 months

Name: AWSELB

Value: EB626B5A40C80CEFD0EB26286F9684716FECD023880992D31DEC38121476558-1

Purpose: This cookie is used to distribute the website's load across multiple servers. Therefore, the page loading speed gets increased.

Expiry date: after one hour

Name: AWSELBCORS

Value: 85FDC7C91873988D19D2D53305AA8CAB73AF02FCEAEB626B5A40C

Purpose: We have not yet been able to find out more information on this cookie. We will inform you as soon as we know more.

Expiry date: after one hour

Note: Please note that the cookies shown above are examples and that this list does not claim to be exhaustive.

How long and where is the data stored?

Your data can be stored on various servers that are distributed across the globe. For example, the data can be stored in the USA, Ireland, South Korea, Taiwan, or Israel.

Wix always stores data until it is no longer required for their provided service. We have not yet been able to find out more about the period the data is stored for.

How can I delete my data or prevent data retention?

You have the option to update, correct or delete your personal data at any time. You can also contact Wix's data protection department directly at privacy@wix.com.

To deactivate, delete, or manage cookies you have to select the appropriate settings in your browser. Depending on which browser you use, the cookie settings work a little differently. The following instructions show how you can set or manage cookies in the most common browsers.

[Chrome: Clear, enable and manage cookies in Chrome](#)

[Safari: Manage cookies and website data in Safari](#)

Firefox: Clear cookies and site data in Firefox

Internet Explorer: Delete and manage cookies

Microsoft Edge: Delete cookies in Microsoft Edge

Wix.com Ltd. is headquartered in Israel. The European Commission declared Israel to be a country that provides adequate protection for personal data of EU citizens.

Moreover, Wix.com is an active participant in the EU-US Privacy Shield Framework, which regulates the correct and secure transfer of personal data. You can find more information at <https://www.privacyshield.gov/participant?id=a2zt0000000GnbGAAS&status=Active>. We hope that with this data protection declaration we were able to make you more familiar to data processing by Wix.com. If you would like more detailed information on this, we recommend the company's privacy guidelines at <https://www.wix.com/about/privacy>.
